Health Assessment Test

Let your health not be a surprise

A once in a lifetime test for you and your loved ones to enable you to know if 70+ critical conditions will impact your life

A health assessment gives a clear picture of your overall health conditions, different organ health status along with genetic factors assessment which not only helps in understanding current health but also helps determine future health risk.

An investment that will benefit you the entire life and help plan it better.

Take the first step with the Health Assessment Test - A one time investment for a lifetime of health.

Health Assessment Test is a comprehensive health assessment solution that screens for genetic medical conditions like cancer, rare diseases and risks of having health conditions like high BP, diabetes, stroke, thyroid, PCOS, etc. Paired with the finest blood test parameters, establishing the course of action has never been easier.

The outcome enables us to lay out diet and exercise regimes based on your DNA in the form of a Personalised Health Guide.

Let's kick-start your health journey!

The Health Assessment Test Covers:

41 Genetic Medical Conditions like cancer & rare diseases

30+ Health Risks like cardiac diseases, diabetes, PCOS, etc

60+ Pathological Tests like cardiac markers, lipid & more

Get A personalized Health Guide, based on **45+** diet & physical health traits
